ABSTRACT

Designed to convey timely, accurate, and comparative information about Florida's 28 community colleges, this fact book provides descriptive and statistical data on enrollment trends, college personnel, educational finances, and governance. The report opens with a brief historical overview of the state system from its beginnings in 1933 to the present, including a list of the 28 colleges and their years of establishment. Next, the report presents statistical tables on the state's community college students, covering: (1) fall 1991 headcount enrollment by ethnicity and gender; (2) annual headcount enrollment by vocational program; (3) annual full-time equivalent (FTE) enrollment by college and discipline; and (4) degrees and other formal awards by college, ethnicit, and gender for 1990-1991. The next series of tables provide information on gender and ethnic breakdowns of full- and part-time employees and data on salaries of full-time faculty. Finally, financial information is presented on the system's revenues, expenditures, fees per college, operating budgets, and costs of instruction and support programs. A glossary of terms, a description of the current state funding policy, and a list of system personnel are included. (BCY)

FOREWORD

The principal purpose of the Report for Florida Community Colleges is to convey timely, accurate and comparative information to interested persons about the system of community colleges in Florida. Sometimes referred to as the "Community College Fact Book," it is intended for use by those people interested in community college education in Florida.

The majority of the tables in the Fact Book were prepared from the Community College Management Information System (CCMIS), a computer-based system which provides a capability to present information which would otherwise be unavailable or too costly. All statistical and financial information used in this publication originated at Florida's 28 community colleges in response to state and federal reporting requirements. The tables present the information most frequently referenced and used by the State Board of Community Colleges and others.

Should you desire to republish any part of the Fact Book or use its data for the development of policy or for research, we recommend that you contact Bureau of Research and Information Systems staff to ensure that you receive any postpublication updates. Additional statistical/financial data about Florida's community colleges are available on request from the Bureau of Research and Information Systems.

We hope that you find the Community College Fact Book informative and useful.

Clark Maxwell, Jr.

STATE COMMUNITY COLLEGE SYSTEM OF FLORIDA

Florida's community college system had its beginning in 1933 when Palm Beach Junior College was established as a public two-year college. From that date until 1947, when the status of St. Petersburg Junior College was changed from private to public, Palm Beach Junior College remained the only public two-year college in Florida. When the Florida Minimum Foundation Program was enacted in 1947, combined state and local support for community colleges became a reality. With this incentive, Pensacola Junior College was established in 1948 and Chipola Junior College, established in 1947 as a private institution, changed its status to become a public junior college.

The Legislature in 1955 established the Community College Council, whose report was published in 1957 under the title, "The Community Junior College in Florida's Future." This report, which was approved by the State Board of Education, contained recommendations for needed legal changes and a master plan for establishing a system of public community colleges in Florida which ultimately would provide post-high-school education within commuting distance of more than 99 percent of Florida's population. With the development and implementation of this plan, Florida became a national model for the development of a statewide system of community colleges.

Consequently, the 1957 Legislature authorized creation of the Division of Community Colleges in the State Department of Education and appropriated funds for six new community colleges to begin implementation of the master plan. These were:

Gulf Coast Community College Central Florida Community College Daytona Beach Community College Manatee Junior College North Florida Junior College St. Johns River Community College

With the opening of Pasco-Hernando Community College in 1972, the master plan had been implemented. Twenty-eight community colleges had been established to serve the citizens of the State of Florida by offering the first two years of a baccalaureate degree, vocational education, and adult continuing education. Furthermore, in order to bring instruction closer yet to students, more than 2,000 other locations, such as churches, public schools, and community centers are also used. In addition, the 28 colleges have established additional centers and campuses to better serve student needs.

To further insure the efficient and effective operation of the State Community College System, the Florida Legislature in 1979 established the State Community College Coordinating Board and in 1983 replaced that board with the State Board of Community Colleges. Since that time, the State Board of Community Colleges has earned the respect of the community college community by strongly preserving local control represented by local Bc. is of Trustees, while at the same time establishing systemwide policies and coordination. Indeed, the Florida System of Community Colleges has received national recognition because of this unusual balance between local control and State coordination and funding.

During the period of time described above, postsecondary education needs in Florida were changing. Identifiable changes include an increase in the mean age of students, changes in enrollment patterns, population growth, changes in population patterns, increased emphasis on vocational education, increased emphasis on economic development, and entry of women into the work force in unprecedented numbers. The Postsecondary Education Planning Commission (PEPC) was established in 1981 to provide overall guidance and direction for the improvement of postsecondary education in Florida. A new community college master plan was developed to become part of the broader plan developed by PEPC. The Master Plan for the Florida Community College System was first published in September, 1983, addressing a number of concerns including emphasis on the improvement of quality, the trend toward increased part-time enrollments, minority needs, women's needs, and student financial aid needs. The 1988 Master Plan was developed to update the 1983 Master Plan. The 1988 plan is also a five-year plan and identifies challenges from which strategic plans will evolve addressing areas such as quality education, economic development and quality of life.

The twenty-eight community colleges comprising the Florida system are listed on the following page along with the year each was established.

THE COLLEGES*

COLLEGE	ESTABLISHED
Palm Beach Community College	1933
St. Petersburg Junior College	1947**
Chipola Junior College	1948***
Pensacola Junior College	1948

**GLOSSARY** 

#### **GLOSSARY**

#### Associate in Arts (AA) Degree

The two-year degree which will transfer to the state university system.

#### Associate in Science (AS) Degree

The two-year degree which is awarded in those programs which are not necessarily designed for transfer to the state university system.

#### CCPF (Community College Program Fund)

Those monies allocated by the Legislature to operate the colleges for the next fiscal year.

#### CEEB (College Entrance Examination Board)

A national, nonprofit, educational association with a membership of over 2,500 colleges, universities, secondary schools, and educational associations and agencies. It is frequently referred to as the College Board. It is known for its SAT test and Advanced and Placement (AP) Programs.

#### CLEP (College Level Examination Program)

A nationwide system of credit-by-examination sponsored by the College Entrance Examination Board.

#### CO & DS (Capital Outlay and Debt Service)

Trust funds established by the State under Article XII of the Florida Constitution with funds derived from a portion of fees collected for automobile license tags and distributed to school districts and community colleges to finance construction of school and community college facilities and to service debts incurred by them for construction of educational facilities.

#### Direct Costs

Those costs associated with conducting activities classified according to the principles and definitions in the Information Classification Structure (ICS).

#### Educational and General Operations

Those activities supported by the general current fund and the restricted current fund.

#### Full Costs

Those costs related to producing a specific quantity of output. Full costing is accomplished only for instructional programs, the assumption being that instruction is the production function of the Florida community colleges.

#### Full-Time -- Credit Student

Any degree student enrolled for 12 semester hours or more.

### Fuil-Time Equivalent (FTE) Enrollment (Annualized)

Student semester hours divided by 40 for Advanced and Professional, Postsecondary Vocational instruction. For all other instruction, 900 instructional hours equate to 1 FTE.

#### General Current Fund

The fund used to account for resources that are available for the general financial requirements of the college, the only restrictions being those imposed by law or the budget.

### PECO (Public Education Capital Outlay)

Bonds sold only by the State under the provision of Article XII of the Florida Constitution for the purpose of financing the construction of higher education facilities. The bonds are retired from the proceeds of revenue derived from gross utility receipt tax.

#### Restricted Current Fund

The fund used to account for resources that are available for the operation and support of the educational programs but are restricted by donors or other outside agencies as to the specific purpose for which they may be expended.

### Unexpended Plan Fund

The fund used to account for resources that are available for the acquisition or construction of physical property to be used for institutional purposes and resources designated for the major repair and/or replacement of institutional property.

# **FUNDING POLICY**

### Present State Funding Policy for Community College Operations

- Provides a lump sum appropriation to each community college through the Community College Program Fund.
- Expects each local Board of Trustees to develop priorities for off ring programs and meeting local needs.
- Gives the local Board of Trustees the flexibility to develop a budget with the available resources which best meets these priorities.
- Provides the local Board of Trustees the flexibility and responsibility to set policy on pay, salary increases, most fringe benefits, and job qualifications.
- The Legislature specifies each year a standard student fee amount per credit hour to be charged. Local boards have the flexibility to set fees at their college anywhere within ten percent above or below this standard amount.
- Provides categorical funding for issues which the Legislature determines should be funded in a specific amount and for which expenditures are to be limited in purpose. Examples are library resources and instructional equipment.

# Community College Program Fund (CCPF)

Base Cost to Continue Enrollment Workload Op. Cost of New Facilities Improved Programs New Programs Total CCPF Student Fee Revenues State Funds CCPF

# Summary Explanation The Community College Program Fund (CCPF)

#### Step 1

Identify the Base Year Funding Level

The total of state general revenue, lottery funds and calculated student fees constitute the base for each college for the current fiscal year.

#### Step 2

Determine the Cost to Continue Current Programs

Using the amount of funds expended by each college in each of several expenditure categories, the price level guidelines are applied to these base amounts to determine the additional funds required to maintain the colleges' existing programs at their present level. This also means serving the same assigned enrollment.

The cost categories usually are: salaries (broken out for faculty, administrators, support staff, etc.), general expenses, utility costs, and operating capital outlay (OCO) expenditures. Each of these sums is multiplied by the price guideline amount, and the additional funding required by each college is identified. All colleges are subject to the same guidelines, but because they spend their money differently, the resulting increases will not be the same.

#### Step 3

Identify Changes in Workload

The enrollment used to calculate changes in workload is assigned in the appropriation act. The statutes specify that the prior year enrollment shall be the basis of the assigned current enrollment.

#### Step 4

Operating Cost of New Facilities

When a college adds a new building to its physical plant, additional operating costs are experienced. Based on the specific college's average cost of operation per square foot, funding is appropriated for each new building's additional space to cover the cost of maintenance and operation.

#### Step 5

Improved Program Funding

For programs for which the Legislature has previously provided funding, additional funds may be earmarked to improve or expand their delivery. Examples might be funding for the College Level Academic Skills Test, the Gordon Rule, and other such items which have been rolled into the program fund.

#### Step 6

New Program Funding

First time funding for systemwide programs specifically earmarked by the Legislature and which are to be rolled into the CCPF lump sum may be provided. Examples might include funding insurance rate increases or student advisement programs. Each college would receive a share of the total increased funds based on some distribution rationale. This might be FTE, headcount or other factors.

#### Step 7

Total CCPF

Adding all of the increases and decreases (steps 1 through 6) for each college results in a new individual college funding base. Because factors other than FTE may be involved in distributing portions of the increased funding for all issues, it is to be expected that the increase per FTE and the overall percentage increase will probably not be the same for each college.

#### Step 8

Student Fees

The calculation of student fees used to support the Community College Program Fund is the final step in the process to determine the amount of state support. Student fee collections are calculated by multiplying the assigned FTE enrollment times the standard fee rates. This calculation of student fee revenues is then deducted from the total amount of the CCPF to determine the state funded portion.

#### Result

State CCPF

This CCPF lump sum appropriation for each college is allocated to each local Board of Trustees to develop an operating budget for the college. Each board may establish priorities for programs and expenditures to reflect local needs and any priorities or intent of the Legislature expressed in the proviso language of the appropriations act.
